### ABSTRACT

The successful use of dental implants to replace missing teeth has been one of the most “exciting and evolving areas of clinical dentistry” this decade. At a time when esthetic dentistry has gained prominence, permanent solutions such as implants have become optimal esthetic treatment options. While implants have expanded restorative treatment options, treatment planning has become more complex for the dental practitioner and an interdisciplinary team approach is recommended. The need for replacing missing teeth involves an interdisciplinary approach with Orthodontist, Periodontist and Prosthodontist.

### BIOGRAPHY

**DR. ABU-HUSSEIN MUHAMAD**  
**Limited to Pediatric Dentistry**  
**DDS, MSc, MScD, Cert. Ped. Den**  
**Athens-Greece**

- DDS 1986 ,DPD(Drodont)Dentistry for Children1988**
- International Short-Term Programme in Orthodontics1994,6WEEKS Aarhus,Denmark**
